Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. Information Disclosure Statement filed on 9/15/03 has been received.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 and 8-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Franklin (U. S. Patent no. 5,971,116).

Note: the term integral does not require the memory to be located physically on the damper.

Damper 120,130, electronic control module 160, Calibration data stored in memory 609 (nonvolatile EEPROM) determined from testing of the damper see column 11 lines 5-25, servo 221

Regarding claim 2 and 14, Controller is able to determine the type of damper used see column 13 lines 18-20 and thus inherently there must an identification tag of some type.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Franklin in view of Schwemmer (U. S. Patent no. 5,396,973).

Franklin is relied upon as above. Franklin does not disclose the memory physically attached to the shock absorber. Schwemmer teaches an electronic module (22 module, damper 20) with memory physically on the shock absorber. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the memory physically mounted on the shock absorber as taught by Schwemmer in the shock absorber of Franklin as such is merely a design choice.
